Europe's Cohesion

Call

The Support to New European Bauhaus Local Initiatives

The Support to New European Bauhaus Local Initiatives call is part of the New European Bauhaus movement that makes the European Green Deal a cultural, human-centred, positive and tangible experience for everyone. It celebrates beautiful, sustainable and inclusive places all around Europe. Its **three complementary core values** are:

- Sustainability – foster climate goals, circularity, zero pollution, and biodiversity
- Aesthetics – increase the quality of experience and style beyond functionality
- Inclusion – promote valuing diversity, accessibility and affordability
